

Copy your Assignment 5 program member and name it ASSIGN6. Rename the program itself as PAYROLL2.

Change the program to produce output exactly identical to the output provided in the document in the Assignment 6 folder on Blackboard named:

360 Assign 6 Report Finishing Fa20 - Solution Output.txt

Print 15 detail lines per page. Mr. Decker will show you how to determine when it's time to print new headers at the top of a new page in lecture this week.

Other

Fully document your program as instructed in the **CSCI 360 Coding and Documentation Guidelines** soon to be found in Blackboard's Course Documents.

Be sure that your ENTIRE output is included in the .txt file BEFORE you submit it for grading. If any or all of it is missing, you will earn a 0 on the assignment.

Submit the .txt output from Marist on Blackboard as before.
